# UNH-IOL APL Data Test Board

V1.0

Category

InterOperability Lab/APL Test Fixtures

View online page

Printed Circuit Board featuring a terminal block connection that provides a simple layout used for tests such as: Test APL.146.2.1, Test APL.146.3.1, and Test APL.146.4.1 defined in the APL Data CTS. There are separate injection points for both the Gaussian Noise Source and Ripple Source as well as locations to connect to the Worst-Case Communication Cable or Cable Plant.

Note: Please use English characters when placing orders.

NO WARRANTY: This hardware is provided *"AS IS"*
